

HARSHA VIDANAGAMAGE

Full stack Developer

+94-76-295-2655 @ harshacc99@gmail.com portfolio Linkedin Colombo, Sri Lanka

SUMMARY

Full Stack Developer with over 3 years of experience in Java/JS, React, Node, Express, MongoDB, Oracle SQL, Typescript. Led development of the Spreading Tool product for Nissan Financial Services. Built an AI agent platform enabling users to create agents using system prompts and modular tools through an MCP layer.

EDUCATION

BSc (Hons) Computer Science

University of Westminster

2022 - 2027 Colombo, Sri Lanka

EXPERIENCE

Software Engineer

XGen Group

2025 - Present Colombo, Sri Lanka

https://los.xgencredit.com/ai

Smart Agent AI Assistant Dynamic AI Agent Generating Platform.

- Implemented a query execution agent integrated with the MCP layer to dynamically generate dialect-specific database queries using LLMs, reducing manual query writing by 70% and accelerating data retrieval workflows.

Associate Software Engineer

XGen Group

2024 - 2025 Colombo, Sri Lanka

https://dev.st.xgencredit.com

Smart Credit Spreading Tool A web-based platform allows users to input and review financial statements at both group and entity levels, perform KPI analysis, calculate risk scores, and handle financial consolidations.

- Designed and developed a dynamic Financial Statement Table with support for row and year-level customization, improving flexibility for analysts and reducing financial statement generation time by 40%.
- Built a configurable risk rating engine using JSON, reducing manual updates and improving developer efficiency by 50%.

Software Engineer Intern

XGen Group

2023 - 2024 Colombo, Sri Lanka

https://los.xgencredit.com

XGen Loan Originations Platform enables financial institutions and trade credit providers to build no-code workflows, risk models, scorecards, verification processes, e-documents, and branch portals, supporting end-to-end business operations.

- Refactored legacy codebase, increasing system performance by 20% and enhancing accuracy through improved algorithms and design patterns.
- Developed Swagger API Documentation for Loan Origination System.
- Developed a report analytics module featuring 5+ key report types including Application Status, Credit Center, Decisioning, Utility, and Growth Reports used by 100+ users weekly to drive business insights; optimized complex queries on Oracle DB, reducing report generation time by 40%.

SKILLS

Client-Side

HTML CSS JS React

TypeScript MUI Tailwind

Shadcn

Server-side

MySQL NodeJS Oracle SQL

Redis AWS MongoDB HTTP/2

Development & Operations
