

Harsha Vidanagamage

ASSOCIATE SOFTWARE ENGINEER

Colombo, Sri Lanka | +94762952655 | harshacc99@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Profile Summary

Developed and deployed full-stack solutions over 3 years in the industry in most JavaScript-related technologies like React.js in front-end development. Also, created back-end solutions in Node.js and Express.js that streamlined data processing workflows.

Have 3+ years of experience in contributing software project teams using popular methods and own methods to bring up the quality and the productivity of the team to the next level.

Work Experience

XGen Group | Associate Software Engineer

2025 - Present

- Leading R&D on AI agent integration to enhance existing company products, improving product efficiency by 25% and driving innovation
- Implemented MCP tools to facilitate efficient communication and integration with large language models (LLMs), enhancing system performance and scalability
- Collaborated with the DevOps team to optimize Continuous Integration/Continuous Deployment pipelines, cutting down deployment time by 35%

XGen Group | Associate Software Engineer

2024 - 2025

- Contributed a team of five engineers in developing financial analysis project, while achieving 100% on-time delivery for all milestones with 6 months
- Optimized frontend rendering performance, significantly reducing load times in a data-intensive application ensuring a smooth and responsive user experience
- Facilitated the migration of critical software components to a fully containerized environment using Docker, increasing development flexibility
- Integrated Redis caching to optimize data retrieval performance, reducing database load by 40% and significantly improving response times across high-traffic endpoints
- Technology Stack of this project is mostly React.js with Node.js as the backend and AWS

- Spearheaded the integration of RESTful API services for real-time configuration management, boosting system reliability by 45%
- Engineered and deployed 3+ microservices to handle complex business logic, achieving a 99.9% uptime
- Attended live deployments and collaborated with teams to meet tight delivery schedules, accelerating release timelines by up to 25% and ensuring timely, high-quality product launches
- Created and maintained comprehensive API documentation using Swagger to ensure clarity, consistency, and high-quality standards across the development team
- Reduced server costs by 20% by implementing efficient code optimization and optimizing database queries in an ORM-powered backend

Education

BSc (Hons) Computer Science**2022 – 2027****University of Westminster, London, United Kingdom**

Major: Web development | Minor: Machine Learning

Core Competencies

- | | | |
|--------------------|---------------------|--------------------------|
| • React.js, ES6 | • Advance Debugging | • JavaScript, TypeScript |
| • Node.js, Express | • AI & ML | • MySQL, MongoDB |
| • Agile, Jira | • Web Workers | • REST APIs |
| • AWS | • HTML, CSS | • Git, Docker, CI/CD |

Projects

E-commerce Web Application (Personal)

Developed and maintained a full-stack e-commerce project using React.js, Node.js and Mongo DB

<https://github.com/harshacv01/e-commerce-fe>

<https://github.com/harshacv01/e-commerce-be>

<https://github.com/harshacv01/e-commerce-admin>

Financial Dashboard (Personal)

Designed and Developed full-stack financial dashboard using Next.js, Prisma ORM, Postgres SQL, Tailwind CSS, Zod

<https://github.com/harshacv01/dashboard>
